

FINAL PROJECT: “NIR: Negros Island Region Discover the Island of Sweetness” A Bootstrap-Based Responsive Tourism Website			
DESCRIPTION: Design and develop a responsive Philippine Tourism Website using the Bootstrap framework that highlights an assigned region in the country. The website should present a visually engaging interface that clearly showcases the region’s identity, including its destinations, activities, products, and festivals. The final output must demonstrate proper application of Bootstrap, responsive design principles, clean navigation, and well-organized content structure to deliver an informative and user-friendly tourism experience.			
WEBSITE CONTENT			Points (130 pts.)
Homepage	Region Identity & Introduction: The homepage clearly presents the assigned region by displaying its name prominently and providing a short but engaging introduction that may include its history, culture, geography, or unique identity, allowing visitors to immediately understand what region the website is about. Hero Section (First Impression): The homepage features a visually appealing hero section with a strong headline, supporting text, and call-to-action buttons that invite users to explore the website, supported by high-quality images or banners that create an engaging first impression. Section Preview for All Pages: The homepage includes preview sections for all major pages such as Where to Go, What to Buy, and Festivals & Events, where each section contains a short description, sample items displayed using cards or images, and a “View More” or “Explore” button linking to the complete page.	40	
Where to Go?	The Where to Go page displays at least eight to ten tourist destinations within the assigned region, each including an image, title, and short description that accurately represents the location. Inner Pages (Tourist Details): Each tourist destination links to a dedicated inner page that contains a detailed description, additional images, and relevant information such as highlights or location, providing a deeper understanding of the place.	30	
What to Buy?	The What to Buy page presents at least eight to ten unique items that may include local souvenirs, specialty products, or regional delicacies, where each item includes an image, product name, and short description Inner Pages (Product Details): Each product links to an inner page that contains the item’s origin, featured image, cultural significance, ingredients (for food items), usage, and unique features, ensuring that every entry accurately reflects the identity, creativity, and cultural heritage of the assigned region.	30	
Festivals & Events	The Festivals & Events page displays at least eight to ten festivals or events, each including a title, image, and short description. Inner Pages (Event Details): Each festival or event links to an inner page that contains detailed information such as featured image, history, significance, schedule, or highlights.	30	
WEBSITE DESIGN			Points (70 pts.)
Responsiveness	Mobile-Friendly Design: Does the website adapt well to various screen sizes, including mobile, tablet, and desktop? Layout Adaptation: Are images, text, and interactive elements resized and repositioned appropriately?	30	
Aesthetics	Visual Appeal: Is the website visually appealing and modern? Consistency: Are fonts, colors, and design elements consistent across all pages?	10	
Content Clarity	Readability: Is text easy to read, with appropriate font size, spacing, and color contrast? Information Hierarchy: Are the most important elements prominently displayed, with clear headings and sections?	10	
Creativity and Innovation	Unique Design Elements: Does the website use creative design elements that enhance the user experience? Engaging Media: Are media elements, such as images, icons, videos(optional), and animations, used thoughtfully and effectively?	20	
PREMIUM POINTS			Points (30 pts.)
Developer’s Page	About Me: The About Me section includes a portrait photo and a brief personal introduction of no more than three paragraphs that reflects the developer’s personality, values, interests, or background. Portfolio: The Portfolio section displays at least three projects, each presented with a title, image, and short description. Blogs: The Blogs section includes at least four blog entries, each with a title and short preview. Resume: The Resume section clearly presents the developer’s education, skills, and achievements in a structured and readable format. Contact Form: The Contact Form includes fields for name, email, phone number, subject, and message, along with a submit button. Social Media: The Social Media section includes icons that link to the developer’s profiles, open in a new tab, and are properly displayed and functional.	30
